Abstract: *In this paper, we present Pet Care System which is grounded on android operation. The idea of this system is to give-exhausting way to take care of your pet grounded on the mobile operation. We describe the design approaches and functional factors of this system. The system was developed grounded on domestic faves experts. The results were divided into 2 corridors developing the mobile operation for advice druggies and analyzing the functionality of the operation, for exploration purposes. The design of the operation and functionality of the system were described.*

Index Terms: Faves, warhorse, Stoner, trafficking, atrocity, ungovernable

I. INTRODUCTION (HEADING 1)

Pet is a domestic beast. The precious population in India has grown from 7 million in 2006 to 10 million in 2011. On an average, 000 faves are espoused every time. Nowadays petting is just not only from a fiscal point of view but also Came a new trend. Lots of people find it difficult how to take care of their faves and where to keep their faves when they go out of the city for a couple of days and occasionally people can't pet though they're interested in petting due to some reasons so they can have a pet at any time. Having a pet can be a stressful and exhausting experience. So to attack this situation this operation is an easier and non-exhausting way to take care of your pet. The pet safety and protection Act would be Establish integrity in the provision of tykes and pussycats. Lots of position-grounded operations are growing up by mobile bias with GPS. The remainder of this paper is organized as follows. Section II presents the system frame of this design. Section III presents details of each module, and Section IV presents the feasibility of the system, Section V presents a Fine model for the system. Eventually, Section VI concludes the paper with the unborn work. No pet care systems and operations are available yet. These apps are used to consult with a croaker via smartphone.

. Type Style and Fonts

Wherever Times is specified, Times Roman or Times New Roman may be used. If neither is available on your word processor, please use the font closest in appearance to Times. Avoid using bit-mapped fonts. True Type 1 or Open Type fonts are required. Please embed all fonts, in particular symbol fonts, as well, for math, etc.

II. EASE OF USE

The template is used to format your paper and style the text. All margins, column widths, line spaces, and text fonts are prescribed; please do not alter them. You may note peculiarities. For example, the head margin in this template measures proportionately more than is customary. This measurement and others are deliberate, using specifications that anticipate your paper as one part of the entire proceedings, and not as an independent document. Please do not revise any of the current designations.

III. PREPARE YOUR PAPER BEFORE STYLING

To apply this design, we studied and collected data from stoner conditions. The information was used as a source of information for the operation of web and mobile operations and database operations and internet network technology was applied to make the system fast and efficient work. From the analysis and design phase, we applied UML (Unified Modelling Language) is a tool for this step. A lot of action was taken to ensure the safety of the slapdash beast from being targeted for beast abuse because of the absence of a mortal as their owner. Not only that, a beast which has the owner had the eventuality to come to the victim of beast abuse or indeed worst beast trafficking. There are 2 orders of beast atrocity or abuse which are neglected and purposeful atrocity.

Abbreviations and Acronyms (Heading 2)

Define abbreviations and acronyms the first time they are used in the text, even after they have been defined in the abstract. Abbreviations such as IEEE and SI do not have to be defined. Do not use abbreviations in the title or heads unless they are unavoidable.

UML (Unified Modelling Language)

GPS (Global Positioning System)

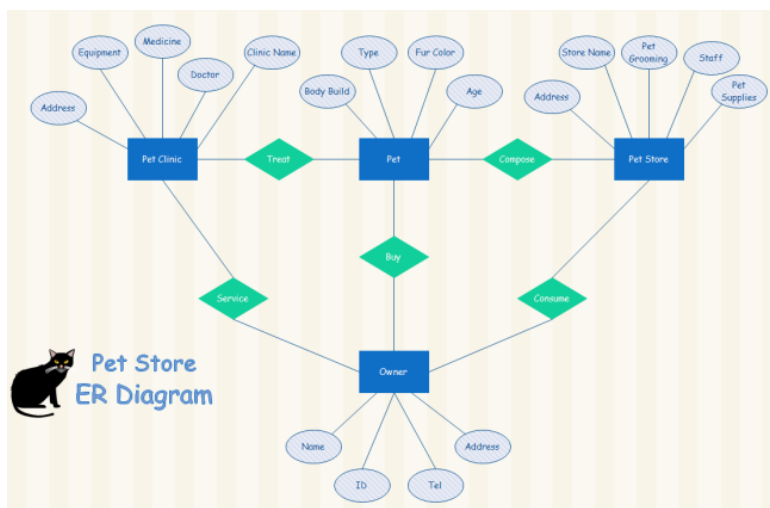

IV. Using the Template

After the text edit has been completed, the paper is ready for the template. Duplicate the template file by using the Save As command, and use the naming convention prescribed by your conference for the name of your paper. In this newly created file, highlight all of the contents and import your prepared text file. You are now ready to style your paper; use the scroll down window on the left of the MS Word Formatting toolbar.

Figures and Table

V. ACKNOWLEDGMENT

To say that I've figured out all of who I'm would be a taradiddle. Unlike the world of fantasy, there's no single defining moment — no Excalibur, no Sorting chapeau — that marks my complete elaboration. My niche in the world constantly changes, but what remains loyal is my commitment to a life of service and adventure, albeit it isn't as cozy as the blue armchair. The pet the operation helps stoner to find their asked faves online also, a stoner can vend their pet from this application. After opting their asked pet they can buy it by doing online payment, for the author of this design, handed payment gateway where stoners can pay. Author of this paper handed a chart point to check the position of their pet delivery. The author of this paper handed a variety of features to their druggies from their pet (online pet shop) operation.
